

Smallest cell: $5 * 10 * 10$ m
Total number of cells: 815278
Cell size on the surface: $40 * 80 * 80$ m

Conductivity of the halfspace = 0.0005
Conductivity of block = 0.05

White dots are the receivers on the surface.

Near the receivers, the block is made up of small $5 \times 10 \times 10$ cells. Thickness is $4 \times 5 = 20\text{m}$

Farther away, the cells are larger $10 \times 20 \times 20$. Thickness = $2 \times 10 = 20\text{m}$

12 Hz - Top is their result, and bottom is ours.

500 Hz - Top is their result, and bottom is ours.
